This \$8M renovation of Denver's premier downtown outdoor shopping mall provided a number of significant updates including new escalators and elevators. BYG accomplished this sprawling scope of work while minimizing the impact to tenants and shoppers. The renovation also included complete exterior painting, complete paving replacement, lighting improvements, signage and a Glenarm crosswalk allowing shoppers to cross safely mid-block. Challenges included an accelerated schedule, changing scope of work and working in an active downtown district requiring numerous street and sidewalk closures.
